JUNE 2017 HIGHLIGHTS

Legendary Motorcar

From Tuesday 13 June at 20:15

Peter Klutt and his team at Legendary Motorcars find, buy, restore, sell - and sometimes race - the coolest cars on the planet. With over thirty years' experience restoring and selling amazing street and race cars, they offer the chance to get a real behind-the-scenes knowledge and expertise in how classic cars are restored, from the chassis to engine and upholstery. This year Peter has plans for a street legal GT40 which has been sitting in the shop waiting for a perfect restoration. Plus, Peter and Gary find a GT350, but the car has some serious flaws and an owner who won't shift on the price. This series explores each aspect of the operation and offers a fascinating look at the drama, quality craftsmanship, and excitement of creating and preserving high-end collector automobiles.

Chasing Classic Cars

From Wednesday 28 June at 21:00

Renowned collector and car archaeologist Wayne Carini hosts this series delving into the elite world of high-end car collections. Wayne continues his personal mission to uncover the world's rarest, most exotic cars - and he finds them in the most unlikely places. Wayne's search for classic cars includes a one of a kind 1930 Minerva by Hibbard and Darrin, which was owned by reclusive collector John 'Hawkeye' Hawkinson, a 1901 Panhard that won the New York to Buffalo rally in 1902, and Ferrari's first limited-production hybrid sports car. Plus Wayne turns the collector world on its head when he makes a surprise announcement about his 1921 Stutz Bearcat. With Wayne's extensive network of contacts, viewers are granted a true insider's examination of the elite club of automotive restorers and collectors.
